PROJECTS

Netflix Clone
- Implemented User Authentication using Email directly from firebase.
- Implemented real time updating video categories like trending, upcoming, top rated etc on the website, allowing for up-to-date information to be displayed at all times.
- Developed a saving favorite shows function that allowed users to save their favorite shows and come back to them later.
  Live Demo: https://lsk-netflix-clone.firebaseapp.com/

Luzzy
- A music streaming platform inspired from spotify.
- Implemented functions to discover songs by selecting a genre or by searching the songs directly.
- Implemented lyrics and related songs componets based on the songs or artists selected.
- Developed a component to display current top songs and artists.
  Live Demo: https://luzzy.netlify.app/

Blog App
- A blog website that supports multiple users at the same time.
- Implemented User Authentication using Google Account.
- User can see the posts on the platform without login but to create a new post login is a must.
- Implemented post deletion function only if the user is the original creator of the post.
  Live Demo: https://lsk-blog.netlify.app/

Blood Bank Management System
- A Desktop Application especially designed for Blood Banks to keep records and manage Bloods, Blood Donors, Donation Events etc.
- Implemented Authentication and Authorization with User and Admin profiles

AirTravel
- A responsive travel guide website developed using HTML, CSS and JAVASCRIPT.
  Live Demo: https://travelair.netlify.app/
